### **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance:

The closest prior art known to the Examiner is listed on the attached PTO 892 and 1449 forms. As shown by references such as Hu et al., compositions comprising a metal, carbonaceous material and a sulfonated conductive polymer are known. However, none of the prior art teaches, discloses or suggests the formation of a particulate composite via the steps including the use of ozone as an oxidizing agent and further metallizing the surface of the polymer grafted carbonaceous particlere as recited in Claim 1 of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
